

Give deaf and hard of hearing people a real break from this subtle discrimination against them. We want to reach deaf people by using any equipment, not just one product such as VRS. Don't limit us to use one equipment (VRS) to call other deaf people who only use the same equipment. Allow us to call them who use different equipment other than VRS. If you permit us to contact others by using one type of equipment only, then what good is to have ADA to protect deaf and hard of hearing people?
